

SLIGHTLINE 175™ SERIES

HOPE'S® WINDOWS, INC REDEFINES MODERN ARCHITECTURAL AESTHETICS

NEW PRODUCT LINE COMBINES MINIMAL SIGHTLINES WITH MAXIMUM PERFORMANCE FOR CONTEMPORARY DESIGN

Jamestown, NY – Hope's Windows, Inc., the nation's leading name in custom hot-rolled steel and solid bronze window and door systems, is proud to announce the launch of its innovative SlightLine175™ Series. This new product line represents the pinnacle of modern architectural design, offering minimal sightlines that maximize glass area and daylight while maintaining the superior strength and performance of hot rolled steel for which Hope's is renowned.

REVOLUTIONARY DESIGN ELEMENTS

The SlightLine175 Series introduces the following features:

- Innovative polyimide thermal extrusion with solid hot-rolled steel mullions, which offer distinct shadow lines, minimally joining window and door frames.
- Rigid mullion components, which reduce bulk and sightlines.
- Engineered to handle high pressures, allowing for expansive glass façades without compromising on structural integrity.

UNCOMPROMISING PERFORMANCE

The SlightLine 175 Series embodies Hope's commitment to excellence, incorporating:

- **Thermal Evolution Technology:** Advanced thermal break technology ensures superior energy efficiency without sacrificing the slim profile.
- **Product Testing and Performance:** Rigorous testing guarantees that the SlightLine 175 Series meets or exceeds industry standards for wind load resistance, impact performance, air infiltration, and water penetration.
- **Power of 5 Finishing:** Hope's proprietary finishing process provides unparalleled protection and longevity, especially in coastal environments.

CRAFTED FOR CONTEMPORARY EXCELLENCE

The SlightLine175 Series represents a leap forward in modern architectural design. By minimizing sightlines and maximizing glass area, architects can push the boundaries of contemporary aesthetics while maintaining structural integrity and performance. Combining the benefits of both the Landmark175™ Series and Jamestown175™ Series, this new product line's versatility allows for a sophisticated addition across all architectural styles.

Combining Hope's true hot-rolled steel profiles with a robust fin-like mullion, the SlightLine 175 Series windows and doors are meticulously handcrafted by skilled artisans in Hope's Jamestown, NY manufacturing facilities. This ensures unparalleled quality, design precision, and attention to detail that has been the hallmark of Hope's for over a century.
